

WORKSHOP

Navigating AI Data Privacy

Ensuring safe AI inside your company

The background of the right half of the image is a dark grey field filled with a pattern of white binary digits (0s and 1s). Overlaid on this background are three large, metallic padlocks. The padlocks are rendered with a fine, grid-like texture, giving them a three-dimensional appearance. They are arranged in a slightly overlapping, diagonal line from the bottom left towards the top right. The central padlock is the most prominent and is in sharp focus, while the others are slightly blurred behind it.

LEARN TO:

- Use AI for strategy, not just content generation
- Get complex and useful answers out of ChatGPT
- Integrate AI into team workflows
- Identify the best use cases for your team

I'm not just a startup guy...

- Led teams inside large enterprises including HP, Apple, AOL
- Built and sold a \$100M+ workforce communications company (FirstUp) selling to large enterprise (Boeing, Amazon, AT&T etc)
- Understand the challenges of enterprise approval, deployment and change management

How can you and your teams ensure you're using AI responsibly?

Today, we'll cover...

- The safe rollout of generative AI tools for enterprise use
- How you personally can avoid sharing confidential or sensitive information with AI when you shouldn't
- How you can set up a policy for your team to use AI responsibly

Poll: How does your organization approach data privacy and confidentiality with AI?

A

We have a closed AI instance, so don't worry about sharing company information

B

We don't have a closed AI instance, but have a clear policy on what data we can share

C

We have no policy that I know of

D

I'm not sure

Context: Enterprise AI being held back by:

1

Data Privacy and IP Concerns

AI models can access
confidential company
information you enter into it

2

Hallucinations

AI provides incorrect answers
confidently when pushed
outside its limits

3

Bias

AI was trained on humans, so
can bring biases into its
answers that are sometimes
hard to detect

Context: Enterprise AI being held back by:

GenAI Customer Adoption**

REASON #1 YOUR COMPANY IS CONCERNED

AI can use your inputs to train its models

AI uses your inputs to train its models

OpenAI data policies

“We continuously improve our models through research breakthroughs as well as exposure to real-world problems and data. **When you share your content with us, it helps our models become more accurate and better** at solving your specific problems and it also helps improve their general capabilities and safety. We don’t use your content to market our services or create advertising profiles of you—we use it to make our models more helpful. ChatGPT, for instance, improves by further training on the conversations people have with it, unless you opt out.”

Enterprise can buy their way out

1

Your company's secure instance

Does not train the
model on your data

mChat for Moderna

Lilli for McKinsey

Some have solved for confidentiality concerns

OpenAI and Moderna recently announced a partnership that could change the future of medicine

- **AI-first org:** **80% adoption** of internal ChatGPT tool, mChat
- **CEO buy-in:** Wants employees to use GPT at **least 20x a day**
- **Seizing the opportunity:** **Deployed 750+ GPTs (AI bots) across the Company** that help drive automation and productivity (R&D, legal, marketing, etc.)

“...collaborations with companies like OpenAI are critical to our ability to scale and maximize our impact on patients.”

- Stéphane Bancel, Moderna CEO

And have gone from initial caution to adoption

Jan 4, 2024

USAID warned employees not to share private data on ChatGPT, memo shows

As of April, the international development agency does not have an outright ban on the generative AI tool.

BY REBECCA HEILWEIL • JANUARY 4, 2024

Aug 19, 2024

OpenAI reveals first federal agency customer for ChatGPT Enterprise

USAID will use the tool to reduce admin burdens and ease partnerships, OpenAI's Anna Makanju said in a Q&A with FedScoop.

BY REBECCA HEILWEIL • AUGUST 19, 2024

USAID has gone from initial caution to adoption by partnering directly with OpenAI

- **Initial caution:** USAID **warned employees** to only use public information in AI tools (April 2023)
- **Evolving approach:** Agency **neither approved nor banned** ChatGPT, emphasizing careful use
- **Compliance focus:** USAID **pursued AI solutions** meeting federal security requirements
- **Pioneering adoption:** Became **first federal agency to adopt** ChatGPT Enterprise (August 2024)

"We of course understand some agencies have hesitations or questions about how this technology can be integrated safely and effectively into their operations. We also continue to advocate for the development of policies that delineate appropriate use cases..."

- Anna Makanju, OpenAI VP of Global Affairs

Some organizations are clearing the way

GOVERNMENT

OpenAI reveals first federal agency customer for ChatGPT Enterprise

USAID will use the tool to reduce admin burdens and ease partnerships, OpenAI's Anna Makanju said in a Q&A with FedScoop.

BY REBECCA HELWEL • AUGUST 19, 2024

Teams can buy their way out...

2

ChatGPT for Teams

Does not train the model on your data

\$25/month
(min. 2 seats)

TEAM LEADS

CHATGPT FOR TEAMS

And so can consumers

3

ChatGPT with data controls

Ability to turn off training
the model on your data

Free, or \$20/month
for GPT Plus

INDIVIDUALS

CONSUMER DATA CONTROLS

The screenshot displays the 'Settings' menu of ChatGPT. On the left, a sidebar lists various settings categories: General, Personalization, Speech, Beta features, Data controls (which is highlighted), and Builder profile. The 'Data controls' section is expanded, showing options to 'Export data' and 'Delete account'. A blue line connects the 'Data controls' option in the sidebar to a detailed 'Model improvement' dialog box. This dialog box contains a toggle switch for 'Improve the model for everyone', which is currently turned off. Below the toggle, there is explanatory text about how user content is used to improve the model and a link to 'Learn more'. A 'Done' button is located at the bottom right of the dialog box.

Settings

- General: Improve the model for everyone On >
- Personalization: Shared links Manage
- Speech: Export
- Beta features: Export data Export
- Data controls: Delete account Delete
- Builder profile

Model improvement

Improve the model for everyone ☐

Allow your content to be used to improve and train our models, which makes ChatGPT better for you and everyone who uses it. We take steps to protect your privacy. [Learn more](#)

What this looks like

PRIVATE ENTERPRISE INSTANCES

mChat for Moderna

Lily for McKinsey

CHATGPT FOR TEAMS

CONSUMER DATA CONTROLS

OpenAI's Approach to Data Privacy

Data Usage Policy

- ChatGPT Team, Enterprise, and API data **not used for model training**
- API inputs/outputs **securely retained for up to 30 days** for service provision and abuse detection

Data Retention

- API data **removed after 30 days** unless legally required to retain
- User history **may be stored for user access**

Content Monitoring

- Reviews conducted for **illicit use, disinformation, or explicit content**
- Violation **may result in platform removal**

The bottom line: Enterprise data is protected from model training, but temporary storage occurs for operational and safety reasons.

Empower safe and effective AI use in orgs

Lanai

The AI empowerment platform

1. **Visibility:** Gain insights into team AI usage and custom analytics
2. **Security:** Protect sensitive data and address AI-related risks
3. **Productivity:** Empower teams to use AI safely for business growth

You can also anonymize your prompts

Example prompt from a Director of Product at a large CPG.

Initial prompt

"I want you to act as my strategic advisor, helping me make a decision for my business. I work at **HealthyGo**, a **large CPG** business that sells **frozen breakfast, cereal, and snack bars**.

I want you to help me decide **what product we should sell next**. I am trying to **expand our product line within our core customer demographics**. **Use the attached spreadsheet for more information on our customer base**.

Brainstorm 5 additional product lines that I should consider given my core customer demographics.

Anonymized prompt

"I want you to act as my strategic advisor, helping me make a decision for my business. I work at **a large CPG** business that sells **frozen breakfast, cereal, and snack bars**.

I want you to help me decide **what product we should sell next**. I am trying to **expand our product line within our core customer demographics**. **My current customer is a young, busy consumer that values healthy snacks on the go**.

Brainstorm 5 additional product lines that I should consider given my core customer demographics.

REASON #2 YOUR COMPANY IS CONCERNED

AI providers will know a lot about
you...and could change their terms
of service

Terms of services could change

OpenAI data policies

“We continuously improve our models through research breakthroughs as well as exposure to real-world problems and data. When you share your content with us, it helps our models become more accurate and better at solving your specific problems and it also helps improve their general capabilities and safety. **We don’t use your content to market our services or create advertising profiles of you—we use it to make our models more helpful. ChatGPT, for instance, improves by further training on the conversations people have with it, unless you opt out.**”

**BUT YOU CAN
OPT OUT**

A blue, folded sticky note graphic with the text "BUT YOU CAN OPT OUT" written on it in white, bold, capital letters.

AI will know more about us

Ask a question about my cancer

A screenshot of the Google search homepage. At the top is a large, colorful illustration of a rowing team in a boat, with the word 'GOOGLE' faintly visible in the background. Below this is a search bar containing the text 'what is stage 1 EGFR lung cancer'. The search bar is highlighted with a dashed blue border. To the right of the search bar are icons for voice search and image search. Below the search bar are two buttons: 'Google Search' and 'I'm Feeling Lucky'.

Upload my cancer report

A screenshot of the ChatGPT interface. At the top, it says 'ChatGPT 4o' with a dropdown arrow. Below this is the OpenAI logo. In the center, there are four rounded rectangular buttons with icons and text: 'Write a story in my favorite genre', 'Pick outfit to look good on camera', 'Superhero shark story', and 'Plan a relaxing day'. At the bottom, there is a text input area. A document icon is visible on the left, and a document card is shown in the input area with the title 'Cancer Tumor Report_Stanford Me...' and the subtitle 'Document'. The document card is highlighted with a dashed blue border. To the right of the input area is a large grey button with an upward arrow icon. The text 'Message ChatGPT' is visible at the bottom left.

We have to weigh the tradeoffs

 Upload my cancer report

More personal answers
with less effort/friction

Regardless of your concerns, odds are your employees are using AI anyway

75%

of knowledge workers around the world use generative AI at work and **78%** of those are doing "BYO AI"

You need an **AI data policy**.

FOR YOURSELF.
FOR YOUR TEAM.
FOR YOUR
COMPANY.

There are two types of “data” to account for

	Information about your company	Information about your customers
What it is	Information about your company's strategy or performance	Information about your customers
Examples	• Financials (Revenue, Cash) • KPIs (i.e. CAC, ACV) • Strategic plans • Product roadmap • Number of customers • Employee data	• Names and email addresses • Other PII • Client metrics (i.e. usage rates)

Provide guidance on the AI platforms allowed, and use a red-yellow-green scale for data

AI Platforms allowed: [enter your AI platforms here]

Red	Do not include in any prompts
Yellow	Okay to include in AI prompts, but anonymize to protect sensitive information
Green	Okay to include in prompts and materials shared with AI

Here's our policy at Section

Platforms: Employees MUST use Section's ChatGPT for Teams account, and may use any additional LLM's for specific purposes (Claude, Perplexity, Gemini). They should follow the same policies listed below for all accounts.

	Data Type
Red	[customer data] User PII (personally identifiable information) such as name, email address, phone number, or address
Yellow	[customer data] User engagement data (must be anonymized to de-identify any specific company or client) [company data] Survey data (anonymized, PII must be removed)
Green	[company data] Your role and company name [company data] Strategic company information (challenges the company faces, curriculum or product roadmap, marketing plan) [company data] Company financial targets and performance [company data] Internal memos including launch plans, game plans or product specs

Here's a larger organization's policy

Example AI Data Policy for a 3,000 person company

Follow this policy unless Legal and IT have reviewed and approved an additional use

	Data Type
Red	• Personal information of employees, clients, or customers (including contact information such as name, email address, physical address, or phone number) • Internal, confidential data (including internal policies, meeting notes, marketing campaign material, business plans, product roadmap, and strategy documents) • Confidential business or personal information belonging to third parties such as clients or vendors • Source code that could cause security or competitive risk to company
Yellow	• Employee performance data (without identifying information) • Aggregated customer feedback • Anonymized project timelines • General industry research (non-company specific)
Green	• Company press releases • General company policies and procedures (already available to the public) • Product descriptions available on the company's website

What should you do?

But it gets complicated

1

Beyond public data

To make the LLM useful, enterprises need to be able to share sensitive information (not just train on public data)

2

User interaction privacy

The more you share, the better the AI becomes
... but now you're sharing more

3

Different levels of security

Depending on the implementation of the AI and your other systems (e.g., Apple Intelligence)

All this means ... deployments are stalling because of real cybersecurity concerns

Bottom Line: What's needed to get adoption

1. **TTT:** Training, Transparency (why we're using AI) and Technology (enterprise versions of best AI)
2. Clear rules of the road/POV about use of AI from organizations and leaders
3. Clear data privacy guidelines that are specific to the company and the role/function (i.e. HR vs. marketing in the same company)
4. Larger organizations: Heads of AI, at least for next 3 years (from business, not technology)

3 T's: A framework for safe AI adoption

Training

Build AI proficiency

Continuously educate all levels on AI capabilities and impacts

Provide hands-on training based on role and tasks

Transparency

Establish rules of the road

Establish clear governance frameworks, data protocols, and expertise centers

Maintain open communication about AI's role in workflows

Technology

Deploy secure AI solutions

Set up sandboxes and tools for safe AI experimentation

Deploy AI technologies with pre-defined privacy settings

What's really needed for enterprise success

1. CEO talk about AI backed up with funded AI plans
2. Heads of Gen AI that understand the business needs and workflows
3. Lower workforce anxiety, higher AI proficiency
4. Carefully chosen AI pilots for early wins/lessons
5. Metrics and benchmarking

Introducing the AI Proficiency Report

- Survey/test that measures AI usage, understanding, and proficiency with prompting
- Measured the proficiency of thousands of knowledge workforce in the US, UK, and Canada to create an benchmarked index
- Measures not just usage, but also proficiency with prompting and safe AI
- Now available for teams and organizations

Get in touch to learn more -
greg@sectionschool.com

The AI Proficiency Report

The AI Class is here – and it's
only 7% of the knowledge workforce

Benchmark your team against our workforce index

April 2024, n=1300+ knowledge workers in the US, UK, and Canada
Index next updated Sept 2024 with 5000+ knowledge workers

AI Skeptics

- Nervous or resistant to AI
- Limited understanding of safe AI usage or prompting

AI Newcomers

- Using AI once in a while
- Limited access to AI at work
- Using mostly free tools for personal use cases

AI Class

- Integrating AI into daily workflows
- 10%+ productivity gains
- Masters of AI's risk and how to use it responsibly
- Expert prompters

AI Experimenters

- Uses AI once a week
- Reporting small productivity gains
- Understand the basics of AI, including prompting

Questions

Tell us how we did!

<https://sectionschool.typeform.com/dataprivacy>

Thank You!

What should you do in this scenario?

If your organization is...

- NOT rolling out an enterprise AI solution
- Giving you vague, form guidelines

= they don't (yet) care about the productivity gains that AI will produce

You should...

- Don't take the additional risk at work (don't get fired for using AI)
- Be the first to use AI as soon as they authorize it (our prediction = they will)

What should you do?
